Subject: Performance Evaluation (Counterintelligence at PNNL)

Memorandum For Julie Turner

From: Mark Roman

Reference our recent telecon re evaluating the counterintelligence (CI) program at PNNL. As you noted, the Aug 7, 2000 memorandum set forth criteria primarily oriented toward the scientific work of the laboratory. I am providing a narrative evaluation of the CI program, rather than using the form provided as Enclosure 3 of that memorandum.

Our overall adjective rating for the CI program, under the leadership of John Slicks, Senior Counterintelligence Officer (SCIO) is "Outstanding". His CI program is aligned with the DOE Strategic Plan Goal of "National Nuclear Security" and the Objective of ensuring "...the security of the Department's nuclear materials, facilities, and information assets". The CI program is also managed in alignment with the "Corporate Management General Goal" insuring the use of sound practices to manage financial and physical assets, human resources and information technology resources in an efficient and effective manner. These comments are relevant to Objectives 1.2 and 1.4 of your tasking memorandum. Please contact me if you would like to have additional input regarding this evaluation.
